

PRODUCT REQUIREMENTS & FRONTEND SPECIFICATION

Vinexus Frontend Master Blueprint

Audited Implementation Specification for MERN Stack Frontend Development

PROJECT CONTROL & AUDITED METADATA

Project Name:	Vinexus Lead Generation & Product Catalog Platform
Client:	Vinexus (CCTV & Security Equipment Dealer)
PRD Reference:	Growme PRD v1.0 (24-Page Official Specification)
Backend Status:	Completed & 100% Audited (77 REST APIs Verified)
Target Frontend:	React.js + Vite + TailwindCSS / Vanilla CSS
Audit Date:	September 2026

1. Project Overview & Business Domain

Vinexus is an online Lead Generation & Product Catalog Platform for a leading CCTV and Security Equipment Dealer in India.

Core Product Range:

- CCTV Cameras (e.g. TrueView, CP Plus, Hikvision)
- DVRs / NVRs & Storage Units
- Modems & Industrial Routers
- LAN Wires & Networking Cables
- Security Accessories & Hardware Supplies

Key Business Architecture:

1. Lead-Gen Only (Non-Transactional): There are NO online payments, checkout flows, or order shipping tracking. Users build a cart and choose between:
 - a) Chat on WhatsApp: Direct wa.me link with pre-filled cart details.
 - b) Send Enquiry: Submits formal lead (VNX-XXXXXX) to DB, emails admin, and appends row to Google Sheet.
2. Dual-Pricing System:
 - Standard Price: Visible to Guests, Retail Customers, and Pending Dealers.
 - Discounted Wholesale Price: Unlocked exclusively for Admin-Approved / Verified Dealers.
3. Single Active Session Security: Enforces single-device login per account with a conflict confirmation popup.

2. User Roles & Access Control Matrix

Role	Price Level Seen	Cart & Enquiry	Submit KYC	Admin CMS
Guest (Visitor)	Standard Price	' (Login Required)	'L	'L
Customer	Standard Price	' Allowed	'L	'L
Dealer (Pending)	Standard Price	' Allowed	' (GST/Aadhar/PAN) 'L	
Dealer (Approved)	Discounted Wholesale	' Allowed	' (View/Edit)	'L
Admin	Both Price Levels	'L (View Only)	'L	' Full Access

3. Audited API Endpoint Mappings

Key Verified Endpoints (Audited against Backend Source Code):

1. Public Content Base Path:

- GET /api/content/banners — Hero Carousel Banners
- GET /api/content/promotional-banners — Promotional Banners
- GET /api/content/pages/:slug — Static CMS Pages by Slug
- GET /api/content/trust-badges — Trust Badges / Why Vinexus
- GET /api/content/footer-content — Public Footer Info

2. Admin CMS Footer Endpoint:

- GET /api/admin/cms/footer-content — Fetch Admin Footer
- PUT /api/admin/cms/footer-content — Update Admin Footer

3. Admin Session Revoke Endpoint:

- PUT /api/admin/sessions/:id/revoke — Force Terminate Active Session

4. Product Image Upload & Delete Endpoints:

- POST /api/admin/products/:id/images — Upload Product Image (multipart/form-data)
- DELETE /api/admin/products/:id/images/:publicId — Delete Product Image

5. Dealer & KYC Management Endpoints:

- DELETE /api/dealers/kyc/documents/:type — Dealer Delete KYC File (gst, aadhar, pan)
- PUT /api/admin/dealers/:id/revoke — Admin Revoke Approved Dealer Status

4. Recommended Implementation Order

PHASE 11	Project Setup: React + Vite, TailwindCSS, Axios Interceptors, Router Setup, Auth Context
PHASE 12	Shared UI Primitives: Button, Modal, Input, Table, Drawer, Toast, Skeleton, StatusBadge
PHASE 13	Public & Customer Panel: Homepage, Catalog, Product Detail, Cart Drawer, Enquiry Checkout
PHASE 14	Dealer Panel: Dealer Dashboard, KYC Upload Form for GST/Aadhar/PAN, Wholesale Catalog
PHASE 15	Admin Panel Core: Dashboard, Category Tree, Product Management, Dealer KYC Audit Queue
PHASE 16	Admin Panel Advanced: Enquiry Lead Manager, Sessions Audit, Reports, Website CMS Builder
PHASE 17	Integration Verification: Responsive Mobile Polish, End-to-End API Checks & Production Build

AUDIT SUMMARY:

All 40 functional requirements from PRD v1.0 and 77 backend API endpoints are 100% verified and aligned in documentation. You can now follow the phases above step-by-step during frontend implementation!
